Computer Major	80	83	83	80	B	Lauren has a natural talent with computers but her interest during class time fluctuates. I often find her fiddling with machines in the back of the lab and only half listening to lecture. She does well on most exams and projects, and participates well when interested. Her work as a student lab monitor is commendable. With a little more self discipline during class, I know she can easily be one of the top students.	Ms.Lyla

Biology	84	77	80	72	B	This is a low performance in relation to what you are capable of doing. Allocation of time to activities, preparation for tests is not to the best. An adjustment in these two areas may show a difference. Also, you are advised to take advantage of the mini lesson sessions to upgrade your analysis.	Mr.Benson
Chemistry	81	70	85	79	B	Josine, still remains a well rounded student in class, though her scores are not to that excellent, her attentiveness and eager to ask and know what she did not understand, in addition to being principled, makes her extraordinary student in class.	Mr.Allan
English	65	82	81	80	B	This term in English has been heavily focused on writing and grammar. We began with basic essay structure and the TOEFL independent essay and progressed to writing personal essays for the This I Believe project on National Public Radio in the United States. After unfortunate midterm exam results (she omitted a question) Josine has been doing well. Her final exam was an improvement, and her This I Believe Essay had a powerful message.	Ms.Jennie
Entrep	86	96	92	82	A	Josine is a well disciplined student, always asks questions in class, although she needs to be more attentive because some times she tends to be absent minded. Josine this performance is quite good just keep it up with more consultation from the teacher!	Mr.Samuel

Biology	94	78	86	72	B	This is an overall good performance. The scores indicate you have kept consistence in your classwork and assignment performance, dealing with every other challenge that comes with new chapters. Preparation for exam is what needs improvement especially an approach to extended/essay questions, a section which has affected your exam score. Drawing skill has picked. Analytical and writing skills have greatly improved and you are advised to keep this up. Based on what you have been able to put together, we believe you shall wind the year well if you manage time so well.	Mr.Benson
Chemistry	81	74	85	79	B	Besides, giving straight forward and well elaborated points, Francine has been among the best students in classroom contributions and participation especially organic chemistry. All she needs is to emphasize much on equation writing in the group chemistry to maximize her scores.	Mr.Allan
English	84	87	89	80	B	This term in English has been heavily focused on writing and grammar. We began with basic essay structure and the TOEFL independent essay and progressed to writing personal essays for the This I Believe project on National Public Radio in the United States. Francine is really improving in English. I think she should consider if she wants to apply for scholarships next year and really develop her English in preparation.	Ms.Jennie
Entrep	93	95	93	82	A	Francine is a very organized, hard working and cooperative student in entrepreneurship. Her grades are very good and encouraging. She should continue working hard and try to participating in class if she is to keep her grades.	Ms.Patience
General Paper	90	96	98	91	A	I am very impressed by Francine's performance. She is focused but sometimes quiet. Thank you for your hard work but you are encouraged to improve on your participation in classroom activities.	Ms.Penelope
Math	83	79	83	73	B	Francine is an active and very humble student. She helps her peers during class time and even outside. She has a latent ability to perform challenging mathematics questions yet unlocked. She needs to put it to use by solving more questions more often. This is a very encouraging result.	Mr.Gonza

However, preparation for taking a test needs attention to be able to apply the knowledge gathered which in the term's session; trial tests, open book tests may help to make you feel the exam atmosphere well before time.	Mr.Benson
Chemistry	76	72	80	84	B	Anoilite's concentration in class this term has improved steadily compared to the last two terms. Coupled with her critical thinking, she is destined to great scores if she maintains that concentration and the interest in the subject.	Mr.Allan
